

Red Group's News

Mila concentrating on keeping the fork near the cup to make her lion's mane.

We began last term looking at some of our favourite animals and learn some interesting facts about them.

Did you know Clown fish, are covered in a thick mucus to stop them being stung by the sea anemone they live in.

Lions have the LOUDEST roar of all the big cats.

Hippos secret a liquid to protect their skin, which acts like a sun screen.

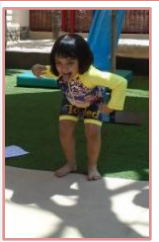

Miu Miu is measuring how tall Johanna is using tubes.

Arvid carefully gluing his hippo's teeth.

We also compared the difference between Indian and African elephants, Can you remember which one has the biggest ears? Giraffes are the tallest animals in the world so we looked at how tall we were. Kangaroos have excellent hearing and are great jumpers as well as rabbits so we played the bell game and saw how far we could jump!

Kaira seeing how far she can jump!

Red group face painting fun!

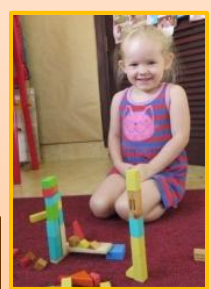

In April we were so lucky the Easter Bunny popped in to see us!!

1, 2, 3 Build!!

Last term everyone was very creative constructing buildings they knew from all sorts of materials.

This is where Johanne lives.

This is where Lise's daddy works.

Martin building the water tunnels for his house.

Niccolo built his house!

Megan showing off her Brachiosaurus

Oscar marveling at his dinosaur egg.

Mathis admiring his pterodactyls

Kaira helping Martin into his dinosaur suit.

Ready Set Go!!

In the last few weeks the red group has become keen riders!!! The children's determination and will to condor riding a big bike has been so rewarding to watch.

I'm pleased to report most of the BIG KIDS can ride a bicycle with NO fairy wheels.

DINO MADNESS!!

In April we looked at the BIGGEST animals who have ever walked on earth. Yes Dinosaurs ! We learnt about what the landscape looked like when dinosaurs were around, it was very different to what it is like now. We created our own landscape scene using a tissue box, a bit of recycling to make a palm tree and hand made salt dough to make a volcano. We also made dinosaur bones, from the salt dough, so we could be Anthropologist looking for fossils.

It was lots of fun learning about Shastasaurus (the largest marine predator which looked like a dolphin), the long necked Brachiosaurus, pterodactyls that flew the skies and we enjoyed acting like a Tyrannosaurus Rex with out tiny little arms. We also learnt about the different footprints herbivores and carnivores left.

Red room Birthdays have began !

We would like to say Happy 4th Birthday to

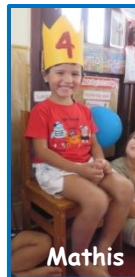

Johanna

WELL DONE RED GROUP !!

Last day of school is

17 June 2015

WOW how time has flown, we only have 6 more weeks left of school! I'm please to say most of our friends will be staying for next year but we are saying *good bye* to **Kaira**, who is going back to India, and **Lise** who is off to join her Brother at ISHMC!

It is sad to see them go and we will miss them loads but we wish them all the best on their new adventures.
